T-Minus Psyche

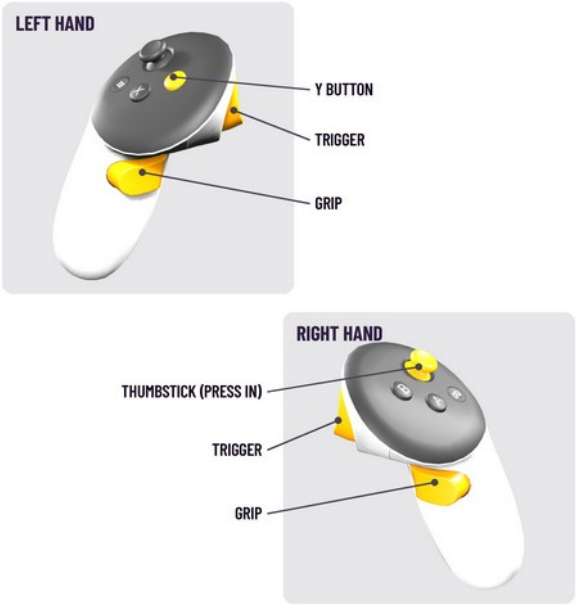

Event team sheet · one visitor at a time, 2.5 minutes each

Each visitor

1. **Check the room is fresh.** The screen should show the start card. If not, reset.
2. **Help with the headset.** Offer to help the visitor tighten the strap until the picture is sharp, then hand them a controller for each hand with the wrist straps on.
3. **Say one line.** “Read the card, then squeeze both triggers to start.”
4. **Follow along on the screen.** The session lasts 2.5 minutes. The launch video plays at the end.
5. **Take the headset back** when the thank-you card shows on the screen, then reset for the next visitor.

Reset for the next visitor

Hold all six together for 4 seconds: left grip, trigger and Y; right grip, trigger and thumbstick pressed down until it clicks. You do not need to wear the headset: a ring fills on the screen, then the start card comes back.

If something goes wrong

- **Screen shows the room tilted or facing the wrong way:** hold the Meta button (∞) on the right controller to recentre.
- **Screen shows the Quest home instead of the room:** open Menu, Unknown Sources, T-Minus Psyche.
- **Headset taken off mid-session:** the game pauses until it is back on. Reset if a new visitor takes over.
- **Battery:** charge the headset during breaks or keep plugged in, Quest headsets are notorious for short battery life.
